Magnetic closure for easy operation

The QuickFree® click-TRAK® Magnetic zipper features embedded magnets in the left and right open-part components, allowing for effortless closure by simply bringing the open parts together. Additionally, when a certain pulling force is applied to each side (based on our lock-strength test), the slider “snaps” open, enabling the zipper to separate without lowering the slider. This quick-release function, combined with its user-friendly design, makes it ideal for a wide range of applications, including quick clothing changes in sportswear, children’s wear, and general fashion.

- ✓ Slider with quick release function
- ✓ User-friendly design for a variety of people
